HERE'S HOW YOU CAN
PC&TV

Dare To Dream

Welcome to Pacific Coast Audio/Video. Our promise is a simple one. We'll enhance your lifestyle by transforming your home into a fun and exciting place to live, work and play. Our goal is to provide you the dream of a lifetime by designing and installing the most sophisticated home integration system and a world-class home theater.

Miner and family
President / Owners

Whether building a new home or retrofitting an existing one, the steps to living a fabulous lifestyle are few and easy. First, we'll discuss the amazing possibilities for your home, all within your budget. Next, we'll design a system that meets your needs of today but allows for upgrades of tomorrow.

Pacific Coast Audio/Video is a highly specialized design and installation company that works with you on a personal level. You'll have the comfort of a friendly environment, working closely with your personal advisor every step of the way.

After the installation is complete, we'll spend all the time necessary to provide you with the proper instructions and support. This will enable you to operate your new system with ease. Now you will have the power to control your entire home with the touch of a single button.

Enjoy beautiful music and crystal-clear video played everywhere in your home. Experience the excitement of high definition movies in the privacy of your own home theater. This is only the beginning.

Warmest Regards,

Tim & Jean Miner

Pacific Coast Audio / Video

ENJOY MOVIES IN YOUR PRIVATE HOME THEATER

Get into the excitement by watching a blockbuster movie in the ultimate comfort of your private home theater. With the push of a single button, the screen will lower from the ceiling, the curtains will open, the lights will dim and the movie will begin to play. Get into the action of high-impact movies by feeling the floor vibrate underneath your seat as big explosions occur during the scene. You'll feel like you're on location as sound travels from one side of the theater to the other.

GET CHARGED IN YOUR OWN SPORTS CENTER

No matter if you prefer football, basketball, baseball or hockey, now you can simultaneously watch all your favorite sporting events in your own sports center. Enjoy local or national games with your family and friends, making your sports fantasies a virtual reality. Even your kids can get into the action by playing Nintendo along side of you.

Live The Fantasy

WATCH MOVIES IN ANY ROOM YOU DESIRE

Television plays a huge role in today's lifestyle. Experience entertainment from your DVD player, cable box, satellite receiver and antenna everywhere in the house. Each video source can be distributed to any room and simultaneously viewed by utilizing only one set of common components. Best of all, you can control all your electronics by simply using a remote control, wall-mounted keypad or touch panel.

SIMPLIFY YOUR LIFE WITH A NETWORKED COMPUTER SYSTEM

Imagine the convenience of a home networking system that enables high-speed data networks and communication lines of today's technology. Networked homes are designed so that you can efficiently fax, talk on the phone and send e-mails - all at the same time. Better yet, each computer can be networked to utilize a common set of office peripherals, such as the laser printer or scanner.

LISTEN TO PLEASANT MUSIC ALL AROUND THE HOUSE

Sound establishes the ambiance of a home. Your choice of music can easily be controlled with a push of a single button, and different rooms can play various selections simultaneously. If you wish to maintain the décor of the home, you'll be delighted with discretely hidden in-wall or in-ceiling ceiling speakers, completely preserving the aesthetics of the home. Take it a step further and complement the yard with quality speakers disguised as landscaping rocks.

Custom Dreams

EXPERIENCE HOME AUTOMATION AND CONTROL

Imagine your home is your castle and you have the power to control it. Integrated systems are designed to operate almost every electronic device in your home. Through simple to use touch screens, key pads or remote controls, your system will allow you to set the home for day, night or away modes. With the push of a single button, you can set the alarm, dim the interior lights and adjust the thermostat. You take it to the next level and control your home by simply programming your cell phone or inputting commands into a website.

Your Dream Home Awaits You

Whether you're building a new home or enhancing an existing one, Pacific Coast Audio/Video will act as your project manager throughout the entire process. We will work with your architect, builder and interior designer to create your perfect home. Our designers and technicians are highly-trained professionals who understand the importance of sophisticated integration. Our entire team is committed to providing you the best level of quality and care.
